

Tanish Chourasia

Software Engineer Intern | MERN Stack | Web Developer
tanishchourasia699@gmail.com | tanish.230101144@iiitbh.ac.in | +91 7999391142
GitHub | LinkedIn | Portfolio

Professional Summary

Performance-driven Computer Engineering student specializing in full-stack development and robust coding practices across the MERN stack. Proficient in agile development methodologies, cloud infrastructure deployment, real-time applications using Socket.io, and state management frameworks to deliver seamless responsive design; seeking a Software Developer position to solve complex engineering challenges.

Technical Skills

Languages & Web Foundations: JavaScript (ES6+), HTML5, C++, Python (basic)
Frameworks & Tools: React.js, Next.js, Node.js, Express.js, Tailwind CSS
Databases: MongoDB, MySQL
Core Engineering: Coding, Debugging, Security Systems, REST APIs, JWT Auth, Socket.io, Git, State Management, Responsive Design, Full-Stack Development

Experience

JK Digital Growth World June 2025 – May 2026
Web Developer Intern (Remote)

- Led full-stack coding initiatives within a fast-paced development framework, deploying MERN applications and managing schemas with MongoDB.
- Designed robust digital security systems via stateless RESTful APIs integrated with multi-factor JWT Authentication and low-latency Socket.io streams.
- Streamlined application workflows through rigorous debugging of frontend components, reducing page-load latency by 30%.
- Transformed complex wireframes into responsive design layouts utilizing semantic HTML5 and Tailwind CSS UI components.

Projects

TaskFlow Pro – Task Management Application GitHub | Live

- Architected a full-stack project platform using Node.js and Express.js, applying advanced coding methodologies to manage asynchronous requests.
- Enforced rigorous application security systems with multi-role JWT authorization models, protected routing, and secure PDF pipelines.
- Iterated on deployment features using Agile development cycles, configuring automated CI/CD pipelines via Vercel and Render cloud infrastructure.

ChatApp – Real-Time Messaging Platform GitHub | Live

- Programmed real-time applications using Socket.io to manage concurrent WebSocket connection instances seamlessly.
- Delivered secure user authentication architectures alongside a mobile-first responsive design UI with low-overhead state management tracking.

Portfolio Website GitHub | Live

- Synthesized a high-performing developer portfolio using React.js and HTML5/Tailwind CSS frameworks for scalable styling configurations and responsive design.
- Reduced interaction friction by executing custom animation models using Framer Motion alongside dynamic routing mechanisms.

Education

Indian Institute of Information Technology, Bhagalpur Bhagalpur, India
B.Tech in Computer Science and Engineering (Computer Engineering) CGPA: 8.09 / 10 2023 – 2027 (Expected)

Certifications

- ServiceNow Certified System Administrator (2026)
- IBM SkillsBuild – Introduction to Large Language Models
- JK Digital Growth World – Web Development Internship Certificate
- AlgoZenith – Data Structures and Algorithms

Achievements

- Executed optimized coding workflows to solve 300+ Data Structures and Algorithms (DSA) problems across competitive platforms.
- Successfully integrated, benchmarked, and deployed 3+ comprehensive web engineering applications into cloud production environments.
